EQUIPMENT COMPANY OF ILLINOIS

Preventive Maintenance Safety Program

At Fairborn Equipment Company we will develop a Preventive Maintenance Program that is customized to meet your needs and help you get optimum use of your equipment. The right amount of Preventive Maintenance, not too much and not too little, will save you money by reducing equipment downtime, costly accidents and emergency repairs.

Utilizing Fairborn Equipment's field-proven Preventive Maintenance methods will result in a consistent reduction in overall equipment maintenance costs. Fairborn Equipment has the industry experience and expertise to determine the optimum maintenance frequency based on your maintenance history and specific manufacturer recommendations.

A Fairborn Preventive Maintenance Program can help you...

- Avoid costly accidents and downtime due to lack of proper maintenance.
- Catch wear items before they become breakdown problems.
- Extend the lifetime of capital equipment.
- Reduce your overhead on special lubricants, tools and parts which Fairborn Equipment provides.
- Maintain a record of your equipment maintenance to ensure OSHA compliance.
- Reduce service calls and in-house maintenance costs by performing adjustments and minor maintenance during Preventive Maintenance visits.
- Reduce long-term maintenance costs by correcting small problems before they grow into costly repairs.
