

# Turbo-Slide™

## Simplicity is Sophistication

### Turbo-Slide's Flex-Panel® is THE FORCE

- Proprietary thermoplastic outer core is impervious to impacts from lift equipment
- Armor Lock™ perimeter seal is flexible and secures the perimeter seal of the Flex-Panel
- EVA inner foam is a closed cell foam and provides R-17 to R-40 values
- Durable, flexible and lightweight

### Fast Speed

- Lightweight Flex-Panel moves at 125"/second
- Reduces cycle times by 30% vs. traditional doors
- Reduces the loss of mass air-flow
- Increases refrigeration efficiencies by reducing defrost cycles

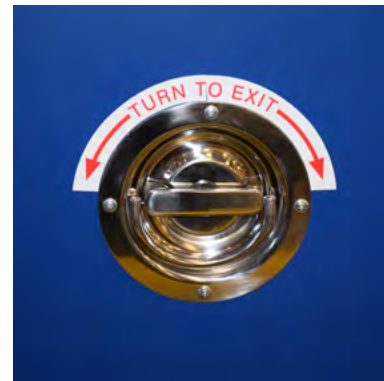

## Tight Seals

- The Flex-Panel is secured to the “IMP” wall by the stay rollers
- The Turbo-Slide Flex-Panel is seamless
- The Turbo-Slide Flex-Panel does not have heat on the door panels
- Bulb seal provides a full perimeter seal around the entire door opening and seals tightly against the door panel when in the closed position
- The only heat on the Turbo-Slide is the bulb seal
- The Turbo-Slide door seals and bottom sweep attach with Velcro and designed to be easily replaced

## Safe Operation

- The Turbo-Slide provides (2) thru-beam photo eyes mounted on either side of the door opening
- The Turbo-Slide does not have heated door panels that could be compromised and cause a fire
- The Turbo-Slide’s System 4® controller provides 24/7 diagnostics and is rated NEMA 4X
- The Turbo-Slide provides manually-assisted egress on the door panel

## The Complete Solution

- Turbo-Slide provides the simple solution of a hard panel sliding door with all the benefits of a high performance door
- Provides all the traditional benefits of a high performance door, with the additional benefits associated with hard panel sliding doors
- A 5-year warranty on the Turbo-Slide Flex-Panel, door track and urethane roller wheels removes any cognitive dissonance from the decision-making process
- The Turbo-Slide offers – for the 1st time – a true hard panel door that will exceed expectations
