

Versa Light®

PATENTED

New Technology in Truck Lighting

Proper lighting can increase safety and minimize product and trailer damage— saving you money! Versa Light's® advanced technology illuminates the entire trailer. Its versatile multi-position flexible tube resists overhead door impact. Versa Light's® computer fan cools the bulb for extended life.

OLD TECHNOLOGY

Old technology truck lights are prone to damage from overhead doors and fork lifts.

NEW TECHNOLOGY

Versa Lights® unique flexible tube design withstands sudden impact, and easily adjusts to any position.

Versa Light provides twice the light of old technology dock lights. The difference between old technology dock lights and Versa Light® is like the difference between night and day.

OLD TECHNOLOGY

*Light when you need it,
right where you want it.*

FAN COOLED

Model 420 Features –

- Easily Positioned
- Durable Construction
- Fan Cooled
- Circuit Breaker Switch
- Grounded Plug
- Stainless Steel Flexible Tube
- Welded Steel Housing
- Protective Bulb Shield
- Spring Mounted Bulb with safety lens

- **Model 421** – coated bulb required in many food manufacturing or distribution locations.
- **Model 470** – 277 volt
- International Models Available

Options –

- **Mounting brackets** – to mount to any round pipe bollard (includes clamps).
